Success Estimator: Lessons Learned Cost Estimating Program Customization

Presented by: Parsons - Charlie Griffin

US Cost - Yancey Joiner

# Background

In late 2005 PIT began a search to standardize its estimating software.

After an extensive selection process
 Parsons chose Success Estimator.

#### Envisioned Estimating Tool - Near term

- To be utilized PIT wide.
- Provide standardized reporting
- Provide required documentation (e.g. FAR compliant reports)
- Develop standardized estimating library/database
- Links to multiple resource databases

### Envisioned Estimating Tool - Long Term

- Web enabled (based or accessibility)
- Time phasing functionality
- Dynamic assemblies/cost models
- Dynamic coupling to drawings
- Multi tiered web reporting
- Potential to link to cost reporting & finance

## Initial Implementation

- Training
- Immediately rolled out to meet needs
  - Entered data as typically applied
  - Utilized existing standard reports

### Road Blocks / Hurdles to acceptance

- Difficulties with applying indirect costs
- Limitations of entry fields
  - Six (6) Cost fields/groups
    - Labor, Equipment, Materials, Other 1, 2, & 3.
  - Limited number of code fields characters
    - 20 Tree/Folder Level code characters
    - 10 Resource code characters.
- Reports did not meet needs
- Interface with schedule

Limitations of entry fields

Presented at the 2008 SCEA-ISPA Joint Annual Conference and Training Workshopsix (MANNA) Presented at the 2008 SCEA-ISPA Joint Annual Conference and Training Workshopsix (MANNA) Presented at the 2008 SCEA-ISPA Joint Annual Conference and Training Workshopsix (MANNA) Presented at the 2008 SCEA-ISPA Joint Annual Conference and Training Workshopsix (MANNA) Presented at the 2008 SCEA-ISPA Joint Annual Conference and Training Workshopsix (MANNA) Presented at the 2008 SCEA-ISPA Joint Annual Conference and Training Workshopsix (MANNA) Presented at the 2008 SCEA-ISPA Joint Annual Conference and Training Workshopsix (MANNA) Presented at the 2008 SCEA-ISPA Joint Annual Conference and Training Workshopsix (MANNA) Presented at the 2008 SCEA-ISPA Joint Annual Conference and Training Workshopsix (MANNA) Presented at the 2008 SCEA-ISPA Joint Annual Conference and Training Workshopsix (MANNA) Presented at the 2008 SCEA-ISPA Joint Annual Conference and Training Workshopsix (MANNA) Presented at the 2008 SCEA-ISPA Joint Annual Conference and Training Workshopsix (MANNA) Presented at the 2008 SCEA-ISPA Joint Annual Conference and Training Workshopsix (MANNA) Presented at the 2008 SCEA-ISPA Joint Annual Conference and Training Workshopsix (MANNA) Presented at the 2008 SCEA-ISPA Joint Annual Conference and Training Workshopsix (MANNA) Presented at the 2008 SCEA-ISPA JOINT ANNUAL PRESENTED AT THE PROPERTY AND THE PRO Labor, Equipment, Materials, Other 1, 2, & 3.

Short-Term/Interim Workarounds

- Number of characters allowed for code fields
  - Tree Level/folder codes limited to 20 characters (e.g. 01.02.03.04.05.06.07).
  - Resource codes limited to 10 characters
- Reports did not meet needs
- Interface with schedule
- Duplicate MS Excel estimate to breakout labor details.
- Data entry fields
  - Duplicate Excel estimate breakout of other details.
  - Cross walks with Creative standardization of coding
- Excel used for concise, easily traceable, FAR compliant reports
- Prepare to test schedule interface

### Resolving Short-Term Workarounds

- Need to eliminate maintenance of duplicate estimates.
- Arranged onsite meeting between US Cost and Parsons.
  - Thoroughly detailed out expectations and requirements.
  - Worked out intricacies of Parsons required outputs within Success Estimator.

# Long-Term Workarounds

- Labor, Equipment, Materials, Other 1, 2, & 3.
- Number of characters allowed for code fields
  - Tree Level/folder codes limited to 20 characters (e.g. 01.02.03.04.05.06.07).
  - Resource codes limited to 10 characters.
- Reports did not meet needs
- Changed implementation of indirect costs entry
  - This impacted implementation of Crew entry
- Data entry fields
  - Custom tags within same cost group
  - Crosswalks with Creative standardization of coding
- Standardize Reports within program.
  - US Cost provided means to access data
  - Crystal Reports provided flexibility to report data

#### Path Forward

- Success Enterprise
  - Substantially expanded in past 2 years
  - Expected to remove workarounds
  - Flexible reporting within program and through Crystal Reports.
  - Same functionality with database resources
  - Same functionality with schedule interface
  - Path to meet long term objectives

#### Lessons Learned

- Run test estimate through program.
- Schedule information exchange with vendor's technical staff
- Discuss intricacies of required outputs & programs limitations.
- Determine plan of attack to cover specific complexities

#### Conclusion

Flexibility

Good Working relationship

Continued expansion of products
