

ORIGINAL EQUIPMENT MANUFACTURERS' COOPERATIVE OPPORTUNITIES GROUP

April 22, 2021

Industry Perspectives on Affordability Analysis

Agenda

1. Opening remarks – Bob Hunt
2. PolLEV Capability – Megan Jones
3. Overview of Affordability - Dr. Darin Hoffman
4. Affordability Perspectives from
 - Wendy Robello, Justin Knowles - Northrop Grumman Corporation
 - Kevin Hewitt - Huntington Ingalls Industries
 - Karen Mourikas - The Boeing Company
 - John Deem - Lockheed Martin
5. What happens next – Bob Hunt

Objective of ICEAA's OEM Engagement

- OEM COG Objective
 - Make ICEAA more valuable and more relevant to OEMs
 - Develop a community of like-minded (OEMs) that is diverse in skills, experience, function, education, and demographics, and committed to the profession
 - Support cost analysis as a profession and not just a job
- How
 - Come together as a community of OEMs to discuss, collaborate, and share via a series of webinars
 - Identify activities to undertake as a community that will deliver more value to OEMs
 - Identify participants and skills to broaden the technical and engineering focus of ICEAA
- Today
 - Discuss industry perspectives on affordability – what that means to me & how it differs from others

PolleEV Interactive Capability

- Link: [PolleEV.com/meganjones104](https://pollev.com/meganjones104)
- First question
 - What does Affordability mean to you?

Affordability Overview from the OEM Perspective

Dr. Darin Hoffman

PolLEV Interaction

- Link: [PolLEV.com/meganjones104](https://pollev.com/meganjones104)
- Question
 2. How many years have you been working in the cost analysis profession?
 - Less than 5 years
 - Between 5 and 15
 - Between 15 and 25
 - More than 25

Affordability according to Wendy Robello & Justin Knowles from Northrop Grumman Corporation

A Perspective on Affordability

- In a perfect world, the PM's, SE's, Executive Approvers and Budgeteers, would ensure a Program is designed to minimize Lifecycle costs, achieving perfect affordability...*however...this never happens*

Affordability → Affordable: able to be Afforded → Afford: *to manage to bear without serious detriment*

~ Budget Constraint + Mission Needs

Expected Skills & Knowledge Base	LCC	Trade Studies	Cost Strategy	Price to Win (pTW)	DTC	BoE Support	EVM & Risk Analysis	Cost Reduction Initiatives
Systems Engineering	X	X		X	X	X		X
Software	X	X				X	X	
Production	X					X	X	X
Business Management			X		X	X	X	
Pricing & Estimating	X		X		X	X	X	
Strategy & BD	X	X	X	X	X		X	X

Affordability spans the entire life cycle and is an integrated responsibility across functions and teams

PolLEV Interaction

- Link: [PolLEV.com/meganjones104](https://pollev.com/meganjones104)
- Questions
 3. In what function do you work?
Choices: Engineering, Finance, Supply Chain, Strategy, PM, other
 4. What phase of the Life Cycle do you work? (select up to 3)
 - Capture/Strategy/AoA
 - Conceptual design
 - Development
 - Production
 - Operations & Support

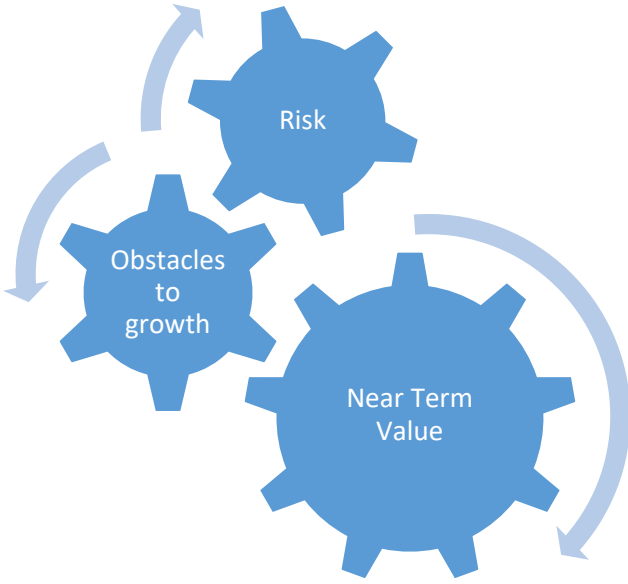

Affordability according to Kevin Hewitt from Huntington Ingalls Industries

Affordability Perspective

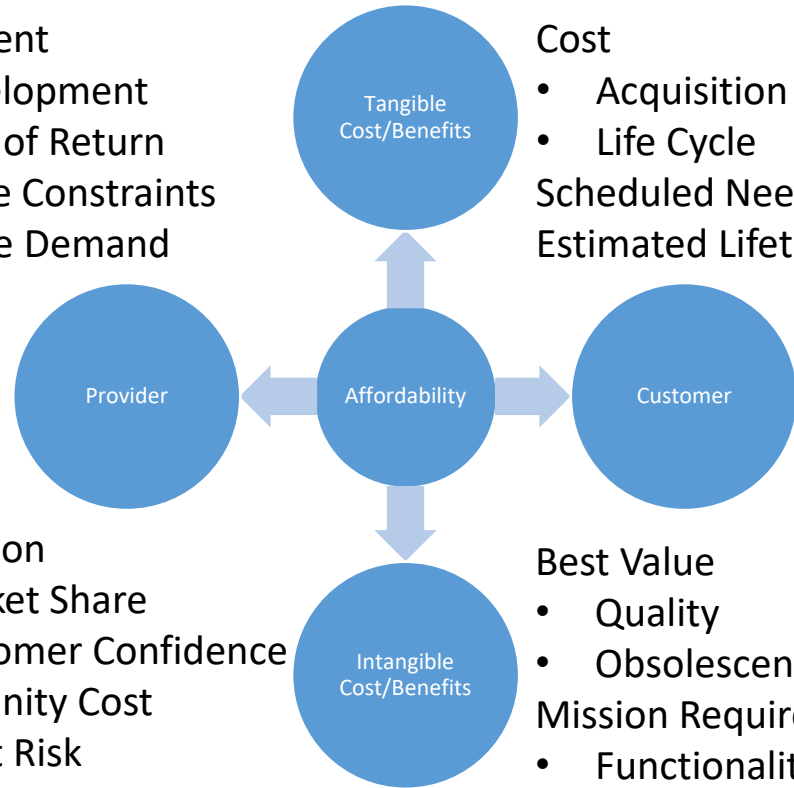

Defining the nature of affordability is like grasping mist, it's relative meaning and importance are solely dependent on the context within which it is discussed.

Affordability is closely related to the evaluation of risk and future value.

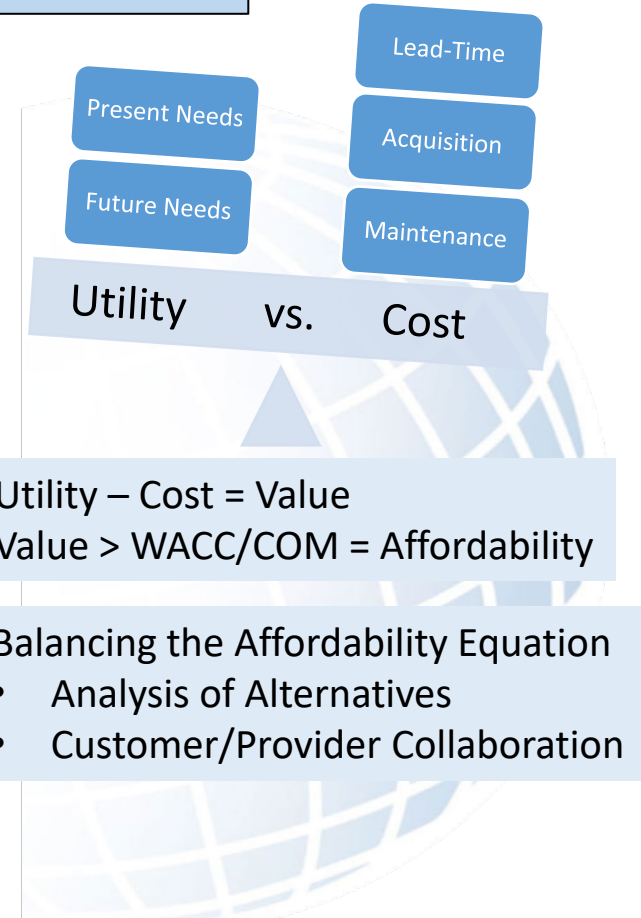

- Investment**
- Development
 - Rate of Return
- Schedule Constraints
Resource Demand

- Reputation**
- Market Share
 - Customer Confidence
- Opportunity Cost
Inherent Risk

- Cost**
- Acquisition
 - Life Cycle
- Scheduled Need
Estimated Lifetime

- Best Value**
- Quality
 - Obsolescence
- Mission Requirements
- Functionality/Efficiency
 - Future Needs

In proposal development, affordability can be described as the balance of relative value between the customer and provider with respect to the tangible and intangible costs and benefits all through the lens of capability/capacity.

PolLEV Interaction

- Link: [PolLEV.com/meganjones104](https://pollev.com/meganjones104)

- Question

5. What are the most important skills required for affordability analysis?

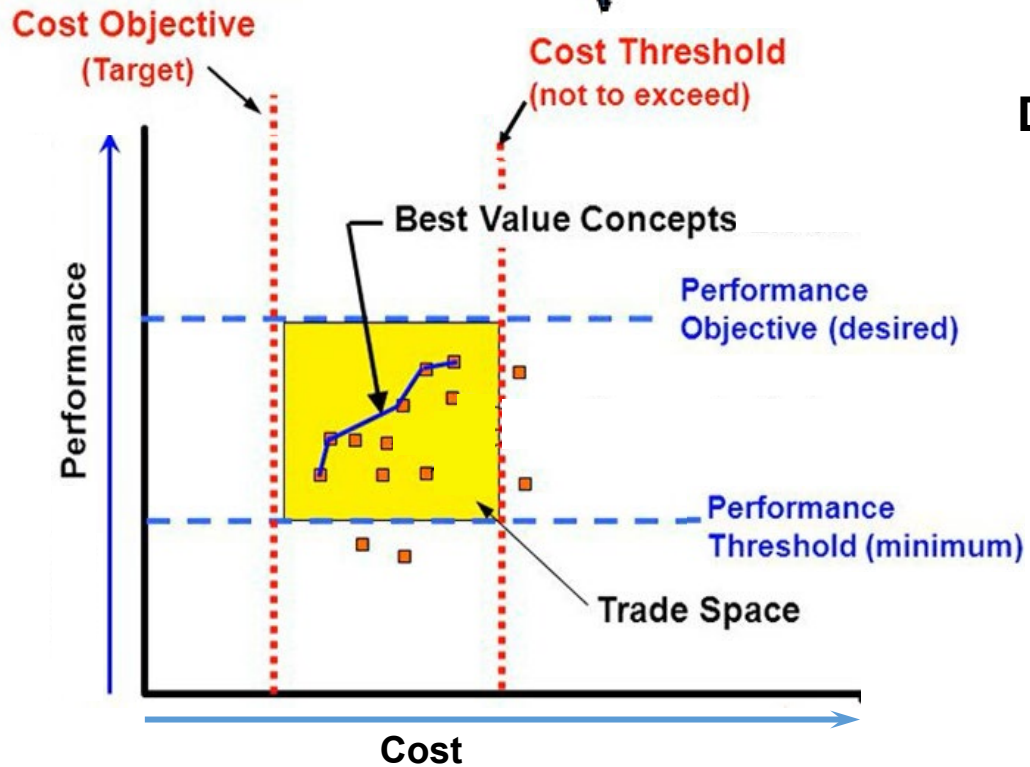

Affordability according to Karen Mourikas from The Boeing Company

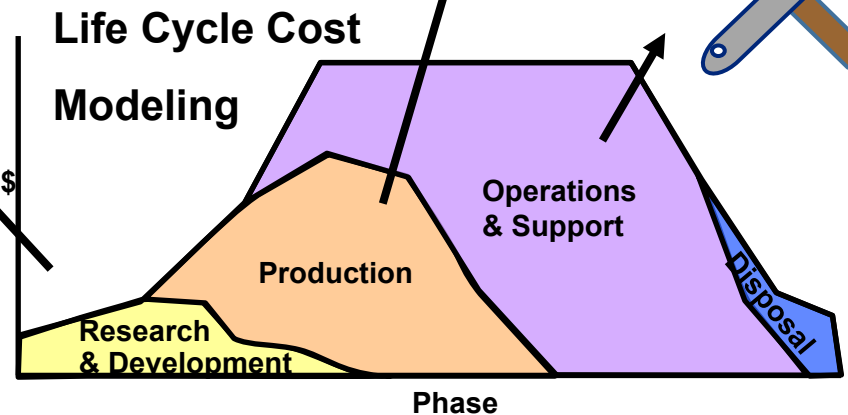

STRATEGY

* = from the
Systems Engineering
Perspective

AFFORDABILITY*

Design

Trade Studies

Phase

PolLEV Interaction

- Link: [PolLEV.com/meganjones104](https://pollev.com/meganjones104)
- Question
 6. What training related to Affordability could ICEAA provide that you don't have access to?

Affordability according to John Deem from Lockheed Martin

Affordability Perspectives

Customer Perspective

Affordability = Value

-  **DEGREE** *benefits* are worth the cost and support strategic goals
-  **CONDITIONS** when costs are in consonance with *requirements*
-  **RESULTS** from analysis of costs versus *resources available*

Contractor Perspective

Affordability = Value

-  **PROPOSAL PHASE** objective is to offer customer value to secure *contract award*
-  **PROGRAM EXECUTION** objective is to deliver customer value per *contract commitment*

Systems Engineer Perspective

Affordability = Value

Value Engineering = Affordability

Value Engineering Skills = Technical Skills x Cost Skills

Body of Knowledge

- Competition Guidelines 
- Best Value Continuum
- Value Adjusted Total Evaluated Price
- GAO Best Practices 
- Target Costing and Design to Cost
- Cost as an Independent Variable 
- Quality Function Deployment
- Design for Manufacturing
- Activity Based Costing 
- Lean Initiatives and Cost Benefit Analyses

Reduction of Total Ownership Costs
Trade Space and Strict Dominance

International Cost Estimating and Analysis Association

PolEV Interaction

- Link: [PolEV.com/meganjones104](https://pollev.com/meganjones104)
- Now that you've heard what we've had to say ... has your opinion changed?
- Question
 7. What does Affordability mean to you?

ICEAA Online Workshop

May 17-20, 2021

www.iceaaonline.com/online2021

- We have altered the overall schedule to better fit the online venue and our increasingly online lives: ICEAA's 2021 Workshop will run for **four half-days**, leaving attendees time to address the demands of work and life for the other half of the day.
- Breakout sessions will be **recorded and available** to registrants on the Online Workshop website and app for **six months after the event**. If two sessions you want to see are scheduled concurrently, or some other conflict arises, you will have six months to catch up on the ones you missed!
- ICEAA has reduced our usual registration rates by **\$700** to reflect the savings we will see from the online format. But attendees' costs are reduced even further by eliminating travel, lodging, and incidental expenses

Final Poll Question

- Link: PolleEV.com/meganjones104

- Question

8. What topics would you like to explore in future OEM COG webinars and/or activities?

Next Steps and Call to Action

- Build upon our Body of Knowledge: Deep dive into Affordability
 - Expand to include related topics such as value engineering, design to cost, economic analysis
 - Review relevant CEBoK materials (module 15 and 16) and/or update / add content
 - Research affordability topics and share with the community
- Partner with our customers to drive efficiency into the proposal process
- Collaborate with government and SETA contractors to share knowledge in order to promote more holistic views and better understanding of issues that face OEMs
- Let us know what other topics you'd like to explore with the OEM COG
- Volunteer to get more involved with the COG and/or share your perspectives
- Spread the word: Next meeting: July 15, 2021 – Topic TBD
